

Improving Our Responses to Alcohol and/or other Drug Issues for CALD Clients and Communities

These forums are being held to engage a diverse range of health service providers and other professions. Each forum will actively discuss what issues are faced and how we can reduce AOD related harm for CALD clients. This will be done through the sharing of knowledge and experience of the group.

WAPHA has kindly funded this project to facilitate the workshops to build capacity within the CaLD & AOD sector.

Each forum will have a slightly different focus but objectives include:

- Develop, support and secure a diverse workforce to address AOD experiences with CALD individuals and communities in the Perth metropolitan region
- Build the competencies of workers paid and unpaid, to respond more effectively to the needs of people who experience harm from AOD use
- To Increase empathy, knowledge and a greater cultural sensitivity with CALD clients with AOD experiences
